CLAIMS LISTING

A listing of the entire set of pending claims 1-20, is submitted herewith per 37 CFR §1.121. The listing supercedes all previous listings.

1. (Currently Amended) ~~A report generator for automatically and An~~
electronically ~~generating a generated~~ and computer-readable medical report,
comprising:

means for providing at least one predetermined field arranged within
the medical report that includes data representative of a medically relevant
characteristic; and

means for automatically inserting wherein the data representative of
said medically relevant characteristic ~~is automatically inserted~~ into said at least one
predetermined field upon report generation.

Filed: March 15, 2001

2. (Currently Amended) The ~~electronically generated and computer-readable report generator~~ of claim 1, further comprising a list of a plurality of defined values associated with the characteristic.

3. (Currently Amended) The ~~electronically generated and computer-readable report generator~~ of claim 1, wherein the characteristic is replaced with a calculation value derived from one or more measurements.

4. (Currently Amended) The ~~electronically generated and computer-readable report generator~~ of claim 1, wherein the characteristic is at least one of a size, a qualifier, a link to a stored value, a time and a date.

5. (Currently Amended) The ~~electronically generated and computer-readable report generator~~ of claim 1, wherein the characteristic in the at least one predetermined field is updated at the time the report is generated, and every time the report is viewed.

6. (Currently Amended) The ~~electronically generated and computer-readable report generator~~ of claim 1, further comprising at least one additional electronically selectable medical characteristic that is displayed when the electronically selectable medical characteristic is selected.

7. (Currently Amended) The ~~electronically generated and computer-readable report generator~~ of claim 1, wherein the electronically selectable medical characteristic is at least one of a pathology, an abnormality, an observation and a qualifier of a test result.

8. (Currently Amended) An system for electronically generating a medical report, comprising:

a report generator for generating an electronic medical report, ; the medical report comprising at least one predetermined field to hold data representative of medical characteristic, wherein the report generator includes an interface for receiving data input, and wherein upon automatic generation of the medical report, a measured value defining a medical characteristic is inserted into the field so that the generated medical report is included with the medical characteristic.

9. (Currently Amended) The system of claim 8, further comprising a list of a plurality of defined values associated with the medical characteristic.
10. (Currently Amended) The system of claim 8, wherein the medical characteristic is replaced with a calculation value derived from one or more measurements.
11. (Currently Amended) The system of claim 8, wherein the medical characteristic is at least one of a size, a qualifier, a link to a stored value, a time and a date.
12. (Currently Amended) The system of claim 8, wherein the report updates the characteristic at the time the report is generated and every time the generated medical report is viewed.
13. (Currently Amended) The system of claim 8, further comprising at least one additional medical characteristic that is displayed when the medical characteristic is selected.
14. (Currently Amended) The system of claim 8, wherein electronically selectable medical condition is at least one of a pathology, an abnormality, an observation and a qualifier of a test result.
15. (Currently Amended) A method of electronically generating a medical report including a plurality of fields representative of a plurality of medical conditions, comprising the steps of:
electronically selecting a medical condition for inclusion within the medical report; and
automatically inserting a measurement corresponding to the selected medical condition when the medical report is generated whereby the measurement replaces the field.

16. (original) The method of claim 15, further comprising listing a plurality of defined values associated with the measurement.
17. (original) The method of claim 15, wherein the measurement is replaced with a calculation value derived from one or more measurements.
18. (original) The method of claim 15, wherein the measurement is at least one of a size, a qualifier, a link to a stored value, a time and a date.
19. (original) The method of claim 15, wherein the medical report updates the measurement at the time the report is generated and every time the report is viewed.
20. (original) The method of claim 15, wherein the medical condition is at least one of a pathology, an abnormality, an observation and a qualifier of a test result.
21. (previously presented) The method of claim 15, wherein the measurement is retrieved from a memory location.
22. (previously presented) The system as set forth in claim 8, wherein the medical characteristic is retrieved from a stored memory location.
23. (previously presented) A computer-readable medium including a set of computer instructions stored on the medium, which when downloaded for processing by a general purpose computer will carry out the method as set forth in claim 15.
